

Facilities Update
12/18/08

The School District is taking advantage of Winter Break to take care of a few potential safety issues.

Starting December 19th, we will be having carpet tiles installed at Lomita Park in the main building. Their current carpet is coming apart at the seams and unraveling, causing potential tripping hazards.

We are also replacing the two metal ramps leading into two portables at Lomita Park. We have patched and repaired them but we are concerned about how safe the ramps are with the rust build-up.

The Fields Agreement with the City of Millbrae commenced on December 1, 2008. The City Parks Division is now mowing all of the fields in the District. Plans are being developed for the renovation of the fields. We will update this website as things progress.
